India's First Indigenous Green Urea Plant in Andhra Pradesh | National Current Affairs | 07 Feb 2026

Why in News?

India's first large-scale indigenous green urea plant will be developed and operationalized at the **Pudimadaka Green Hydrogen Hub** in Andhra Pradesh.

Key Points:

- **Strategic MoU:** NTPC Green Energy Limited (NGEL), a subsidiary of NTPC Ltd., and **Assago Industries Pvt. Ltd.** have signed a MoU.
 - Under the agreement, NGEL will supply **green ammonia, renewable electricity, CO₂**, and other utilities to Assago.
- **Objective:** To produce **green urea** using **green hydrogen and renewable energy**, reducing reliance on fossil fuel-based ammonia.
 - The initiative marks a significant step towards building a **domestic green urea value chain**, reducing dependence on imported fertilizers.
 - Aims to **create jobs**, strengthen the **green energy sector**, and contribute to Andhra Pradesh's industrial development.
- **Environmental Impact:** Expected to **significantly cut carbon emissions** compared to conventional urea plants.
 - Supports India's **Net Zero 2070 goal** and the **Green Hydrogen Mission** under the National Hydrogen Policy.
- **Innovation:** First-of-its-kind **indigenous green urea technology** in India, promoting self-reliance in fertilizer production.

Kerala CM Launched Invasive Species Detection App | National Current Affairs | 07 Feb 2026

Why in News?

Kerala has officially launched **NeophyteID**, an AI-powered mobile application designed to detect and track invasive plant species across the state.

Key Points:

- **Launch & Developers:** Officially launched on 2nd **February, 2026**, by Chief Minister Pinarayi Vijayan, the app was developed by the **Malabar Botanical Garden and Institute for Plant Sciences (MBGIPS)**.
- **AI Technology:** Utilizing the **YOLOv11** machine learning model, the tool provides real-time identification and **geospatial tracking** for nearly **98 invasive species** in Kerala.
- **Functionality & Access:** Users can photograph plants for instant, data-driven identification in both **English and Malayalam**.
- **Ecological Impact:** NeophyteID aims to prevent the destruction of native plants during eradication efforts.
- **Data-Driven Conservation:** The use of AI and **geospatial tracking** provides researchers with **data-rich insights** into invasive species distribution patterns — critical for planning removal and restoration strategies.
