

सगिरौली में भूकंप

चर्चा में क्यों ?

नेशनल सेंटर ऑफ सीस्मोलॉजी (NCS) के अनुसार, मध्य प्रदेश के सगिरौली ज़िले में 3.6 तीव्रता का **भूकंप** दर्ज किया गया।

मुख्य बंदि:

- NCS, पृथ्वी वज्जान मंत्रालय के अंतर्गत आता है।
- **भूकंप** की घटनाओं को कंपन के परमाण या तीव्रता के अनुसार मापा जाता है। परमाण पैमाने को **रकिटर पैमाने** के रूप में जाना जाता है।
- यह परमाण भूकंप के दौरान जारी ऊर्जा से संबंधित है, जैसे **पूरण संख्या में यानी 0-10 में व्यक्त किया जाता है।**

EARTHQUAKE

ABOUT

- Shaking of the earth; caused due to release of energy, generating **seismic waves in all directions**

EARTHQUAKE WAVES

- Body Waves:** Move in all directions travelling through the body of the earth
 - P Waves:** Move faster, First to arrive at surface, Similar to sound waves, Travel through gaseous, liquid and solid materials
 - S Waves:** Arrive at surface with some time lag, Travel only through solid materials
- Surface Waves:** Last to report on seismographs, More destructive, Cause displacement of rocks
 - Love Waves:** Same motion as S-waves (horizontal) without vertical displacement, Sideways motion perpendicular to the direction of propagation, Faster than Rayleigh waves
 - Rayleigh Waves:** Cause the ground to shake in an elliptical pattern, Spread out the most of all seismic waves, Move vertically and horizontally in a vertical plane

HYPOCENTER

- Location where the earthquake starts (below earth's surface)

EPICENTER

- Location right above the Hypocenter (on the earth's surface)

CAUSES OF EARTHQUAKES

- Release of energy along a Fault/Fault Zones** (break in the crustal rocks)
- Movement of **tectonic plates (most common)**
- Volcanic eruption** (stress changes in rock-injection/withdrawal of magma)
- Human activities** (mining, explosion of chemical/nuclear devices etc.)

MEASURING EARTHQUAKE

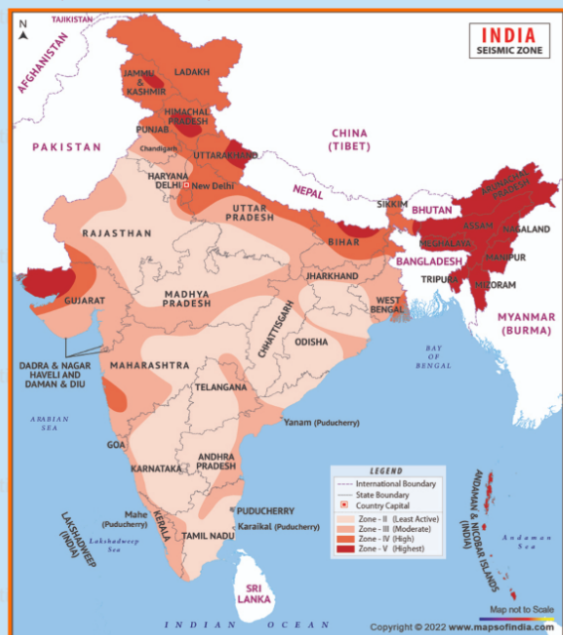

- Seismometers** - Measures seismic waves
- Richter Scale** - Measures magnitude (energy released); range: 0-10)
- Mercalli** - Measures intensity (visible damage); range: 1-12)

DISTRIBUTION

- Circum-Pacific Belt** - 81% of earthquakes
- Alpide Earthquake Belt** - 17% of the largest earthquakes
- Mid-Atlantic Ridge** - Mostly submerged underwater

EARTHQUAKE IN INDIA

- India is **one of the highly earthquake affected countries** due to the presence of technically active mountains - the Himalayas.
- India has been divided into **4 seismic zones (II, III, IV, and V)**
