Urban character of Harappan civilisation

① Well defined city planning which included grid pattern, proper sanitation and water supply, standard brick size.

② Pattern of subsistence - Presence of granaries indicates trade of food grains for urban area, metalcraft & sculpture, seals etc indicates substantial non agricultural activities.

③ Presence of Harappan script - in pictorial form which is yet to be deciphered.

④ Lower & upper town shows the social stratification probably ruler & ruled (or) traders & commoners.

There is debate on evolution of Harappan culture. But various evidences supports it's gradual evolution of regional social - economic factors.

① Presence of Pre harappan, mature Harappan & post Harappan sites indicates gradual evolution. + mature sites show all evidence of urban nature

② Increase in agricultural production started at Mehargarh (Baluchistan) supported stable life. + extensive irrigation led to growth of agriculture

③ This resulted into trade & craft activities & finally to evolution of urban centres.

④ It was further amplified due to two factors -

Ⓐ irrigation through canal

Ⓑ Use of waterways for trade

Above mentioned factors supports the theory of gradual evolution through socio-economic development which lasted for almost 700 years.

Steel industry is among one of eight core industry which can be benefited from emerging technologies.

Role of emerging technology in steel sector

① Green energy & clean energy can help to decarbonise the steel sector which is one of the most important sector for carbon emission.

② Internet of Things can help to reduce the human interface in production & enhance the productivity of the sector.

③ 3-D printing can help to produce customised product with greater precision.

④ Blockchain technology can help to strengthen the supply chain of raw materials as well as the finished products.

⑤ Artificial intelligence (AI) & Machine Learning (ML) can help to reduce the production cost by minimising error of production.

⑥ Drones can be used as a tool to effective monitoring of function, right from mining operation to the final delivery of the product.

However there are some concern which needs to be addressed for effective use of these technology.

① Misuse such as 3-D printing for leathal weapons.

② High initial cost which may hamper technological adoption.

③ Focus on green energy adoption may slow down initial production.

④ shortage of skilled manpower to handle these technologies.

'Where positive regionalism is a boon for a diverse social structure like India, it threatens the time-tested fabric of 'Unity in Diversity' if promoted in an ultra-manner'. Comment.

(250 words) 15

Regionalism is the sense of oneness among people residing into a particular region. + interest toward sub national entity

Positive regionalism as boon

① It helps in creating cooperative attitude towards certain group of people providing opportunity to grow by that community.

② It also helps to demand for reasonable share in development & hence eliminating the unbalanced regional growth.

③ It helps in creating the environment for cooperative federalism & competitive federalism. Hence promoting competition among

various region to grow.

⑤ It may help in correctly identifying the strengths & weakness of the region & promoting specialisation in specific field.

However ultra-regionalism may harm the unity & diversity of India in following ways.

① The interest of one region starts conflicting with of others & hence creates sense of insecurity & hatred.

② It may result into sons of soil theory & hence demanding for region based reservation.

Eg - Person from UP & Bihar were attacked in Maharashtra.

• Reservation of private job in various state.

③ It can result into militancy.

movement as in case of north-east-ern states.

Eg - recent example of Manipur violence.

④ It may promote secessionist tendencies as it was witnessed in the Punjab. Recent demands for Khalistan was resurfaced.

⑤ It may result into water dispute as seen in various states such as Karnataka - Tamilnadu.

⑥ Boundary dispute may arise and it can be used by minority of selfish minded people.

Eg - Maharashtra - Karnataka - Belgaon dispute.

Hence, the thin line between regionalism & ultra regionalism must be understood by people to ensure growth of vibrant Indian nation.

Demographic potential is the benefit arising out of change in age-population structure where more working age population is present than non working population.

As per various estimates, India would be in demographic dividend phase till 2054.

Factors influencing employability:

① Lack of skills among youth & large part of economy is informal in nature.

② Further rise of gig & platform economy has hampering impact on stimulus to skilling.

③ As per India skills report 2021 - half of graduates are not employable.

rapid population growth

inadequate economic growth

- ④ This shows lack of industry - academia linkage.
- ⑤ Further, fast changing nature of technology is another factor.
- ⑥ Pace of upskilling is not upto the mark.
- ⑦ Less focus on research & development at university level is another factor.
- ⑧ Stagnant manufacturing sector is unable to absorb labours.
- ⑨ Jobless growth due to automation, rise of AI, machine learning etc.

India is a net energy importer country & needs to upscale its domestic production to reduce dependence on import.

Reason for declining domestic production

- ① Limited mineral oil resources than rising demand.
- ② Ageing oil wells & no new discoveries of oil fields.
- ③ Financial & technical constraints on the part of oil ~~man~~ digging companies.
- ④ Russian cheap oil import hindered incentive to invest in new discoveries of oil field.
- ⑤ Domination of state owned companies in production & exploration.

⑥ Limitation due to presence of these reserve in off shore areas, tribal areas etc.

⑦ Focus on decarbonising economy & push for net zero may render investment of companies worth - less.

suggestion

① Opening the sector for more private participation.
