## Greek Island of Lesbos

 [drishtiias.com/printpdf/greek-island-of-lesbos](https://drishtiias.com/printpdf/greek-island-of-lesbos)

- **Lésbos**, also called **Mitílíni**, is a **greek island**.
- It is the largest island after Crete and Euboea in the **Aegean Sea**.
- The island is largely volcanic in the west, and numerous thermal springs indicate the unstable subterranean structure that has caused severe earthquakes throughout history.
- The irregular coast of Lésbos is penetrated by **two narrow-mouthed bays**, Géras (southeast) and the Gulf of Kallonís (southwest).
- The principal peak is **Mount Lepethymnus** (Áyios Ilías) which reaches 3,176 feet.
