

PLI Scheme for IT Hardware and Pharmaceuticals

 drishtias.com/printpdf/pli-scheme-for-it-hardware-and-pharmaceuticals

Why in News

Recently, the Union Cabinet has cleared **Production-Linked incentive (PLI)** schemes for **pharmaceuticals** and **IT hardware**, including laptops, which would cost the government as much as Rs. 22,350 crore.

Earlier, the government had announced the **PLI scheme for medical devices, mobile phones** and specified active pharmaceutical ingredients, with a proposed outlay of Rs. 51,311 crore.

Key Points

PLI Scheme:

- It aims to give companies **incentives on incremental sales** from products manufactured in domestic units.
- It invites foreign companies to set units in India, however, it also **aims to encourage local companies** to set up or expand existing manufacturing units.

HOW DOES THE INCENTIVE WORK

It is a kind of subsidy to the sector

Is a direct payment from the budget to goods made in India	Amount varies from sector to sector	Is based on disadvantage /disability faced by a sector
---	--	---

- **IT Hardware Sector:**

- **About:**

- The scheme, worth Rs. 7350 crore, will **offer 1-4% cash incentives** on net incremental sales (over **base year 2019-20**) for IT products manufactured in India.
 - The **Target Segments** include Laptops, Tablets, All-in-One PCs and Servers.
 - **Duration:** 4 years

- **Benefits:**

- India will be well positioned as a global hub for **Electronics System Design and Manufacturing (ESDM)** on account of integration with global value chains, thereby becoming a destination for IT Hardware exports.
 - **Employment Generation** potential of over 1,80,000 (direct and indirect) over 4 years.
 - Provide impetus to **Domestic Value Addition** for IT Hardware which is expected to **rise to 20-25% by 2025**.

- **Pharmaceutical Sector:**

- **About:**

- The **Rs. 6,940-crore PLI scheme implemented in 2020** focuses on the critical bulk drugs, whereas **this scheme is likely to focus on other types of bulk drugs.**
 - It intends to give **incentives between 2020-21 and 2028-29 (9 years).**
 - **Drug manufacturers** applying for the scheme will have to be registered in India and **will be placed into one of three categories** based on their Global Manufacturing Revenue (GMR).

- **Categories of Drugs Targeted by the Scheme:**

- **First Category:**

- It includes biopharmaceuticals, complex generics, patented and **orphan drugs**, often expensive for which India relies a lot on multinational drug makers.

- **Second Category:**

- It comprises **Active Pharmaceutical Ingredients (APIs)**, Key Starting Materials (KSMs) and Drug Intermediates (DIs).

- **Third Category:**

- It includes other critical repurposed, auto-immune, anti-**cancer**, anti-diabetic, **anti-retroviral**, anti-infective and **cardiovascular** drugs as well as in-vitro diagnostic devices and drugs not manufactured in India.

- **Incentives:**

- **For First and Second Category:**

- 10%** of incremental sales value for the first four year of the scheme, followed by **8%** for the fifth year and **6%** for the sixth year of production under the scheme.

- **For Third Category:**

- 5%** of incremental sales value for the first four years, **4%** for the fifth year and **3%** for the sixth year.

- **Benefits of PLI in Pharmaceuticals:**
 - **Reduced Dependency on China:**
 - India's capabilities in APIs have reduced over the years, mostly due to **cheaper alternatives from China.**
 - The pharmaceutical industry here is currently dependent on the bordering country for nearly **70% of the bulk drugs it imports.**
 - **Enhance Exports:**
 - The Indian pharmaceutical industry is the third-largest globally in terms of the volume term of production and is worth **USD 40 billion in value.**
 - The country contributes **3.5% of total drugs and medicines exported globally.**
