

Crowdfunding for Rare Diseases

 drishtias.com/printpdf/crowdfunding-for-rare-diseases

Why in News

Recently, the Delhi **High Court** has ordered **the Ministry of Health and Family Welfare** to explore **Crowdfunding** to help two children, who are suffering from a **Rare Disease** known as **Duchenne Muscular Dystrophy**.

Key Points

- **Constitutional Provision Involved:**

The HC held that '**Right to Health and Healthcare**' is a **fundamental right** which has been recognised by the Supreme Court to be a part of the '**Right to life**' under **Article 21** of the Constitution.

- **Direction to the Society and Authorities:**

- The **High Court** directed the **society in general and authorities in particular** to ensure that the **life of such children is not compromised**, even if there is a small window of improving their chances of survival or even providing a **better quality of life**.
- Directed **the Ministry of Health and Family Welfare** to give a specific timeline in respect of the finalisation and notification of the **Draft Health Policy for Rare Diseases, 2020**. The draft policy has a section where the **government proposed crowdfunding for treatment of high-cost Rare Diseases**.

CrowdFunding

- **About:**

- Crowdfunding is a **method of raising capital through the collective effort of a large number of individual investors**.
- This approach taps into the collective efforts of a large pool of individuals, primarily online via social media and crowdfunding platforms and leverages their networks for greater reach and exposure.

- **Types:**
 - **Donation-Based Crowdfunding:** Donation-based crowdfunding is a way to source money for a project by asking a **large number of contributors to individually donate a small amount to it.** In return, the backers may receive token rewards that increase in prestige as the size of the donation increases. For the smallest sums, however, the funder may receive nothing at all.
 - **Rewards-Based Crowdfunding:** Rewards-based crowdfunding involves **individuals contributing to a business in exchange for a “reward,”** typically a form of the product or service which company offers. Even though this method offers backers a reward, it’s still generally considered a subset of donation-based crowdfunding since there is no financial or equity return.
 - **Equity-Based Crowdfunding:** Unlike the donation-based and rewards-based methods, **equity-based crowdfunding allows contributors to become part-owners of the company by trading capital for equity shares.** As equity owners, the contributors receive a financial return on their investment and ultimately receive a share of the profits in the form of a dividend or distribution.
- **Benefits:**
 - **Reach –** By using a crowdfunding platform, one has **access to thousands of accredited investors** who can see, interact with, and share the fundraising campaign.
 - **Presentation –** By creating a crowdfunding campaign, **one goes through the invaluable process of looking at the business from the top level—**its history, traction, offerings, addressable market, value proposition, with digestible packages.
 - **PR & Marketing –** From launch to close, one can share and **promote the campaign** through social media, email newsletters, and other online marketing tactics.
 - **Validation of Concept –** Presenting the concept or business to the masses affords an excellent opportunity to **validate and refine offering.**
 - **Efficiency –** One of the best things about online crowdfunding is its **ability to centralize and streamline fundraising efforts.**

Rare Diseases

- A rare disease is a **health condition of low prevalence** that **affects a small number of people** compared with other prevalent diseases in the general population.
 - There is **no universally accepted definition of rare diseases** and the definitions usually vary across different countries.
- Though rare diseases are of low prevalence and individually rare, collectively they affect a considerable proportion of the population.
- **80% of rare diseases are genetic** in origin and hence disproportionately impact children.
- In India there are **56-72 million people affected by rare diseases.**

Duchenne Muscular Dystrophy (DMD)

- **About:**

It is a **genetic disorder** characterized by **progressive muscle degeneration and weakness** due to the alterations of a protein called dystrophin that helps keep muscle cells intact.

- **Symptoms:**

- Muscle weakness
- Enlargement of the calves
- A waddling gait
- Lumbar lordosis (an inward curve of the spine)
