### Why in News

---

Recently, the **Inequality Virus Report**, released by **Oxfam International**, has found that the **Covid pandemic** deeply **increased the existing inequalities** in India and around the world.

The report states that **Covid has the potential to increase economic inequality** in almost every country at once - the first time this has happened since records began over a century ago.

### Key Points

---

- **Impact of the Pandemic on Rich vis-a-vis Poor:**
  - **India introduced one of the earliest and most stringent lockdowns** in the face of the pandemic and its enforcement **brought the economy to a standstill, triggering unemployment, hunger, distress migration and untold hardship** in its wake.
  - The **rich were able to escape** the pandemic's worst impact; and while the **white-collar workers isolated themselves and worked from home**, a majority of the **not-so-fortunate Indians lost their livelihood**.
  - The **wealth of Indian billionaires increased by 35%** during the lockdown and by 90% since 2009 to USD 422.9 billion, **ranking India sixth in the world after the USA, China, Germany, Russia and France**.
- **Impact on Informal Sector:**
  - India's large informal workforce **was the worst hit** as it made up 75% of the **122 million jobs lost**.
  - Informal workers had relatively **fewer opportunities to work from home and suffered more job loss** compared to the formal sector.
  - The 40-50 million **seasonal migrant workers**, typically engaged working in construction sites, factories etc. were **particularly distressed**.

- **Impact on Education:**
  - Over the past year as **education shifted online**, India saw the **digital divide worsening inequalities**.
  - On the one hand, **private providers experienced exponential growth** yet, on the other, just **3% of the poorest 20% of Indian households had access to a computer and just 9% had access to the internet**.
  - It noted that **the long disruption of schooling risked doubling the rate of out of school**, especially among the poor.
- **Health Inequalities:**
  - Oxfam found that since India does not report case data desegregated by socio-economic or social categories, it is **difficult to gauge the distribution of the disease amongst various communities**.
  - India currently has the **world's second-largest cumulative number of Covid-19 positive cases** and globally, the poor, marginalised and vulnerable communities have higher rates of Covid-19 prevalence.
  - The **spread of disease was swift among poor communities**, often living in cramped areas with poor sanitation and using shared common facilities such as toilets and water points.
- **Sanitation Facility:**
  - **Only 6% of the poorest 20% households had access to non-shared sources of improved sanitation**, compared to 93% of the top 20% households in India.
  - In terms of caste, **just 37.2% of Scheduled Castes (SCs) households and 25.9% of Scheduled Tribes (STs) households had access to non-shared sanitation facilities**, compared to 65.7% for the general population.

- **Gender Disparities:**
  - **Employment:**
    - The **unemployment rate among women** rose from already high **15% before Covid to 18%**.
    - This increase in unemployment of women **can result in a loss to India's Gross Domestic Product (GDP)** of about 8% or USD 218 billion.
    - Of the women who retained their jobs, as many **83% were subjected to a cut in income according to a survey by the Institute of Social Studies Trust.**
  - **Health:**
    - Beyond income and job losses, **poorer women also suffered healthwise because of the disruption in regular health services and Anganwadi centres.**
    - It is predicted that the **closure of family planning services** will result in 2.95 million unintended pregnancies, 1.80 million abortions (including 1.04 million unsafe abortions) and 2,165 maternal deaths.
  - **Domestic Violence:**

The **pandemic also fueled domestic violence against women.** As of November 2020, cases of domestic violence rose by almost 60% over the past 12 months.
- **Suggestions:**
  - There is an urgent need for policymakers to **tax the wealthy individuals and rich corporates and use that money to invest in free quality public services and social protection** to support everyone, from cradle to grave.
  - Reducing inequalities is very important but it should be a medium-term target. Between growth and distribution, India must get the sequencing right.
  - India **needs to grow first before it can distribute.** Otherwise, it can get stuck in a low-income equilibrium.

## **Oxfam International**

- Oxfam International is a **group of independent non-governmental organisations** formed in **1995**.
- The name "Oxfam" comes from the Oxford Committee for Famine Relief, founded in Britain in 1942.
  - The group campaigned for food supplies to starving women and children in enemy-occupied Greece during the Second World War.
- It **aims to maximize efficiency and achieve greater impact to reduce global poverty and injustice.**
- The Oxfam International Secretariat is based in **Nairobi, Kenya.**
