## 'Fewer but Newer' Nuclear Arms: SIPRI

 [drishtias.com/printpdf/fewer-but-newer-nuclear-arms-sipri](https://drishtias.com/printpdf/fewer-but-newer-nuclear-arms-sipri)

The **Stockholm International Peace Research Institute (SIPRI)** has reported that the world is witnessing less nuclear arms but with modernising and increasing size.

- **At the start of 2019**, the United States, Russia, Britain, France, China, India, Pakistan, Israel and North Korea had a total of some **13,865 nuclear weapons** with a **decrease of 600** from previous year.
- The drop in recent years can mainly be attributed to the **US and Russia**, whose combined arsenals still make up more than **90 percent of the world's nuclear weapons**.
  - It is partly a result of the **New START treaty** – that was signed between the United States and the Russian Federation in 2010 which puts a cap on the number of deployed warheads as well as getting rid of obsolete warheads from the Cold War era.
  - There is a concern on the future of treaty as it will expire in 2021 and there is no serious discussion on its extension.
- **The Non-Proliferation of Nuclear Weapons (NPT)** has also played a vital role in controlling proliferation of nuclear arms.

Because of the NPT, the number of nuclear arms has been drastically reduced since a peak **in the mid-1980s when there were some 70,000 nuclear warheads** in the world.
- This decrease in number of nuclear arms is observed with **modernisation of nuclear arms coupled with increasing size of arms** especially by China, India, and Pakistan.
- The report has shown worry over the **build-up of nuclear arms** on both sides of the border **between India and Pakistan**, and the danger of a conventional conflict escalating to a nuclear one.

- Global disarmament efforts also suffered a blow when the United States announced in February, 2019 that it would withdraw from the **Intermediate-Range Nuclear Forces (INF) treaty**, prompting Russia to say it would also suspend its participation.

**Intermediate-Range Nuclear Forces (INF) treaty** was signed by the United States and the Soviet Union in 1987 to eliminate and permanently forgo all of their nuclear and conventional ground-launched ballistic and cruise missiles with ranges of **500 to 5,500 kilometers**.

### **The Stockholm International Peace Research Institute (SIPRI)**

- The SIPRI is an independent international institute dedicated to research into conflict, armaments, arms control and disarmament.
- Established in 1966 at Stockholm, SIPRI provides data, analysis and recommendations, based on open sources, to policymakers, researchers, media and the interested public.

### **The Treaty on the Non-Proliferation of Nuclear Weapons (NPT)**

- The NPT is a landmark international treaty whose objective is:
  - to prevent the spread of nuclear weapons and weapons technology,
  - to promote cooperation in the peaceful uses of nuclear energy,
  - and to further the goal of achieving nuclear disarmament.
- The Treaty represents the only binding commitment in a multilateral treaty to the goal of disarmament by the nuclear-weapon States.
- Opened for signature in 1968, the Treaty entered into force in 1970.
- A total of 191 States have joined the Treaty, including the five nuclear-weapon States.
