- **The Disability Problem:**
  - Disabilities is an **umbrella term**, covering **impairments, activity limitations, and participation restrictions.**
    - An impairment is a problem in body function or structure;
    - An activity limitation is a difficulty encountered by an individual in executing a task or action;
    - A participation restriction is a problem experienced by an individual in involvement in life situations.
  - As per **Census 2011**, in India, out of the total population of 121 crore, **about 2.68 crore persons are 'Disabled'** (2.21% of the total population).
    - Out of 2.68 crore, 1.5 crore are males and 1.18 crore are females.
    - Majority (69%) of the disabled population resided in rural areas.
  - Globally there are 1 billion people with disabilities, which is 15% of the global population.
  - They face a lack of **holistic rehabilitation, inadequate skilling, lack of seamless mobility and lack of suitable employment.**
  - These factors combined together largely confined persons with disabilities to their homes, leading to inaccurate awareness on their issues and wrong perceptions about their abilities.
