

# Indian Oil Extra Green Diesel & Green Combo Lubricants First Trial In India Begins From Haryana

## Why in News

- Recently, IndianOil has started the first trial in India of IndianOil Extra Green Diesel and Green Combo Lubricant from Ballabgarh Bus Stand in Haryana. With this green diesel, there will be relief from pollution caused by vehicles, while mileage will also increase by 5 percent.

## Key Points

- Haryana's Transport Minister Moolchand Sharma started this trial from the bus stand at Ballabgarh. This oil has been discovered by the Indian Oil Center in Faridabad.
- The Transport Minister said that 10 buses of roadways will be used for the trial of Extra Green Oil. In this, using this oil continuously, its quality will be checked on all parameters.
- On this occasion, Dr. SSV Ramakumar, Director, IndianOil's RD Centre, said that in various trials of this green combo of IndianOil, till now fuel economy has benefited between 5 and 7 percent and above.
- After a trial of 40 thousand km, it will be implemented in the entire Haryana Roadways, due to which Haryana Roadways will benefit about 40 crores annually.
- This extra green diesel and green combo lubricant will reduce pollution and increase the mileage of vehicles. This will reduce the emission of about 1000 tonnes of carbon dioxide and will benefit in environmental protection.
