

# Covid-19: India's Leading Cause of Death

## Why in News

According to the most recent estimates by the **Institute for Health Metrics and Evaluation (IHME)**, the **Covid-19 pandemic has emerged the biggest cause of death in India.**

- IHME is an independent global health research centre at the University of Washington, US.

## Key Points

### ▪ Death due to Covid-19 Pandemic:

- India has recorded **more than 19 million cases of coronavirus**-second only to the US and has **confirmed more than 2,15,000 deaths.**
- The **human toll of the pandemic is more than double the number of humans killed in over 320 natural disasters** during the recent two decades (2000-2019).

### ▪ Other Top Causes of Deaths in India:

- Ischemic heart disease (second),
- Chronic obstructive pulmonary disease (third),
- Strokes (fourth),
- [Diarrhoeal diseases](#) (fifth),
- [Neonatal disorders](#) (sixth),
- [Lower respiratory infections](#) (seventh),
- [Tuberculosis](#) (eighth),
- [Diabetes mellitus](#) (ninth) and
- [Chronic liver diseases](#), including cirrhosis (tenth).

### ▪ Reasons for Covid-19 being the Leading Cause of Death:

- The **'double mutant' B.1.617** Indian variant of SARS-CoV-2 has heightened risk.
- Lives have been lost due to the **lack of preparedness of governments, India's poor health infrastructure, lack of medical oxygen** and even **medicines.**
- The **Centre and state governments have been accused and held responsible** by the [Supreme Court](#) and High Court for undermining the scale of crisis and failure to manage it.
- Experts have also been **unhappy with India's Covid-19 vaccine procurement and pricing policy.** States have to await their quota of vaccines.

## Way Forward

- The IHME advises governments **to impose strict physical distancing norms** for six weeks at least once deaths cross 8 per million.
- The Supreme Court advised both Centre as well as states **to resort to lockdowns** if needed but to also ensure livelihoods weren't impacted.
