- The past is also combined with the glorious potential of the future in the Madhya Pradesh Pavilion. The pavilion was also presenting the picture of how the Mega Skill Development Park being set up in Bhopal in collaboration with technology and ITEES, Singapore will transform Madhya Pradesh.
- Major products of all the districts of Madhya Pradesh were presented in the pavilion under '**One District - One Product**'. Kodo-Kutki processed food prepared by women self-help groups were presented.

Pedal Operated Maize Sheller | Haryana | 29 Nov 2021

Why in News

- On November 27, 2021, a pedal operated maize sheller that extracts corn kernels, developed by the scientists of Chaudhary Charan Singh Haryana Agricultural University, received a design patent from the Patent Office, Government of India.

Key Points

- This machine was invented under the leadership of Dr. Vijay Kumar Singh and retired Dr. Mukesh Garg of the Department of Processing and Food Engineering of the college. The design application was made for this machine in the year 2019.
 - The use of this machine will be very beneficial for small farmers. This will help in the preparation of maize seed, as the grain extracted by it breaks down to only one percent and its hourly efficiency also ranges from 55 to 60 kg.
 - Only one person is needed to operate the modern machine and it does not have any problem of transportation from one place to another, as it weighs about 50 kg, with wheels attached.
