

Clinical Trial of Covid-19 Vaccine: ZyCoV-D

Why in News

Recently, India has started phase I/II **clinical trials** of [Covid-19 vaccine - ZyCoV-D](#), designed and developed by **Zyventus** (a pharmaceutical company) with **support from the Department of Biotechnology (DBT)**.

- The adaptive phase I/II clinical trials will assess the **safety, tolerability and immunogenicity** of the vaccine.
- The **other indigenously developed** vaccine - [Covaxin](#) - produced by Hyderabad based Bharat Biotech is also underway to start clinical trials.

Key Points

- **Description:** ZyCoV-D, a **plasmid DNA vaccine**, comes under the **Vaccine Discovery Programme** supported by the Department of Biotechnology under the [National Biopharma Mission](#).
 - Plasmids are **circular deoxyribonucleic acid (DNA) vectors** that can be used as vaccines to prevent various types of diseases.
- **Pre-Clinical Phase:** It was found to initiate a **strong immune response** in multiple animal species like mice, rats, guinea pigs and rabbits.
 - The [antibodies](#) produced by the **vaccine** were able to **neutralize the wild type virus** indicating the protective potential of the vaccine candidate.
 - No safety concerns were observed in repeat dose by both **intramuscular** (directly into muscles) and **intra-dermal** (superficial injection into skin) routes of administration.
- **DNA Vaccine Platform:** The development of ZyCoV-D has established the **DNA vaccine platform** in the country which is simple to deploy, temperature stable, and consistently manufacturable- thus lowering costs and enhancing the effectiveness of a vaccine.
 - It provides ease of manufacturing the vaccine with **minimal biosafety requirements**.
 - It has shown much improved **vaccine stability and lower cold chain requirements** making it easy for transportation to remote regions of the country.
 - Furthermore, the platform can be **rapidly used to modify the vaccine** in a couple of weeks in case the virus mutates.

National Biopharma Mission

- It is an **industry-academia collaborative mission** for accelerating biopharmaceutical development in the country.
- It was **launched in 2017** at a total cost of **Rs. 1500 crore** and is 50% co-funded by [World Bank](#) loan.
- It is being implemented by the **Biotechnology Industry Research Assistance Council (BIRAC)**.
 - BIRAC is a **Public Sector Enterprise**, set up by the **Department of Biotechnology (DBT)**, Ministry of Science & Technology.

- Under this Mission, the **Government has launched Innovate in India (i3) programme** to create an enabling ecosystem to promote entrepreneurship and indigenous manufacturing in the biopharma sector.
- **Objectives:** Development of **vaccines, medical devices, diagnostics and biotherapeutics** besides, strengthening the **clinical trial capacity** and building technology transfer capabilities in the country.
