

## **Kashmir Saffron got GI Tag**

## Why in News

• Recently, the Kashmir saffron got Geographical Indication (GI) tag status.

## **Key Points**

- Saffron cultivation is believed to have been introduced in Kashmir by Central Asian immigrants around the 1st Century BCE.
  - It has been associated with traditional Kashmiri cuisine and represents the rich cultural heritage of the region.
  - It is a very precious and costly product.
- In ancient Sanskrit literature, saffron is referred to as 'bahukam'.
- It is cultivated and harvested in the Karewa (highlands) of Jammu and Kashmir.
- Uniqueness: The features which differentiates it from other saffron varieties available the world over are:
  - It is the only saffron that is grown at an altitude of 1,600 m to 1,800 m above mean sea level.
  - It has longer and thicker stigmas, natural deep-red colour, high aroma, bitter flavour, chemical-free processing.
  - It also has a high quantity of crocin (colouring strength), safranal (flavour) and picrocrocin (bitterness).
- Types: There are three types of saffron available in Kashmir Lachha Saffron, Mongra Saffron and Guchhi Saffron.
- Uses:
  - Kashmir saffron is used globally as a **spice.** It also helps in revitalizing health.
  - It is used in cosmetics and for medicinal purposes.
- Benefit of tag: With the GI tag, Kashmir saffron would gain more prominence in the export market.
  - Iran is the largest producer of saffron and India is a close competitor.
