New Research Project Proposals Selected Under IMPRINT-2

For advancing research in the high education institutions, the government has approved 122 new research projects under IMPRINT-2 covering domains like energy, security, healthcare, advanced materials, ICT, security/defence etc.

- **IMPRINT (IMPacting Research INnovation and Technology)** is a first-of-its-kind Pan-IIT and IISc joint initiative to develop a new education policy and a roadmap for research to solve major engineering and technology challenges that India must address and champion to enable, empower and embolden the nation for inclusive growth and self-reliance.
- The ten domains that represent the most important areas for the country along with their coordinating institutes are:

    - Healthcare Technology
    - Computer Technology
    - Advance Materials
    - Water Resources
    - Sustainable Habitat
    - Security and Defense
    - Manufacturing Technology
    - Nano-technology Hardware
    - Environment and Climate
    - Energy Security

- The scheme was released in 2015 by Ministry of Human Resource Development.
- The principal motto remains the same for each domain: (a) to create an education policy for inculcating scientific temperament and innovation skill, and (b) to develop the research roadmap for technology preparedness.
