

# **White Fungus**

## Why in News

As the central government asks states to notify <u>black fungus or mucormycosis</u> an <u>epidemic</u>, an infection called white fungus or Candidiasis has also been found to affect some people.

- <u>Covid-19</u> patients are **more prone to white fungus** as it affects the lungs and similar symptoms are created like that of coronavirus.
- Black fungus is a serious but rare fungal infection caused by a group of molds called mucormycetes, which is abundant in the environment.

# **Key Points**

#### About:

- White Fungus or Candidiasis is a fungal infection caused by a yeast (a type of fungus) called Candida.
- Candida normally lives on the skin and inside the body, in places such as the mouth, throat, gut, and vagina, without causing any problems.
- Candida **can cause infections** if it grows out of control or if it enters deep into the body (for example, the bloodstream or internal organs like the kidney, heart, or brain).
  - The most common species that causes infection is Candida albicans.

#### Cause:

- This infection can be caused due to low immunity, or if people come in contact with things that contain these moulds like water, etc.
  - Children and women are more at risk of contracting the fungal infection.
- Like the black fungus, white fungus is also more likely to afflict people with compromised <u>immune systems</u>, pre-existing medical conditions, <u>AIDS</u>, a recent kidney transplant or <u>diabetes</u>.

### Symptoms:

- People experience symptoms similar to Covid if it reaches the lungs such as chest infection, despite testing negative for the virus.
- White fungus affects the lungs as well as other parts of the body including the nails, skin, stomach, kidney, brain, private parts and mouth.

### Diagnosis and Treatment:

- **CT scans or X-Rays** can reveal the condition.
- Patients with the white fungus are currently being treated with known anti-fungal medication.

#### Prevention:

- Special caution is required of moulds in water that can lead to infection.
- Proper sanitation is very important.
