

Pi Chatbot Powered by Inflection-2.5

Source: IE

Pi, the world's 'friendliest' chatbot, powered by the new **Inflection-2.5 large language model (LLM)**, has emerged as a breakthrough in conversational AI technology, offering deep and meaningful interactions.

- Pi, developed by **Inflection AI, a California-based company**, offers empathetic, helpful, and safe conversations, setting it apart from other chatbots.
 - Inflection 2.5 is an **upgrade to a large language model (LLM)** created by Inflection AI.
- Inflection 2.5 allows Pi to access and process information from the real-time web, providing users with up-to-date answers to questions.
 - Inflection 2.5, competes with leading LLMs like GPT-4 while using only 40% of its computational power for training.
- Unlike **ChatGPT** and **Gemini**, Pi is designed as a companion rather than a personal assistant, offering support, intelligence, and companionship.
