

# Indian Army's AH-64E Apache Helicopter Induction

[Source: TH](#)

The [Indian Army Aviation Corps](#) took a significant step towards modernisation with the establishment of its first unit dedicated to operating [AH-64E Apache attack helicopters](#) in Jodhpur, Rajasthan.

- In 2020, [Boeing](#) signed an agreement with the Government of India for the acquisition of six more Apache helicopters for the Indian Army.
  - The **AH-64 Apache** is the world's most advanced multi-role combat helicopter. Used by the US Army and a growing number of international defense forces.
- This marks a pivotal moment as the Apaches will become the **second attack helicopters** in the Army's arsenal, following the indigenous [Light Combat helicopter Prachanda](#).
