Key Points

▪ About:

- The Index ranked countries **measuring their policies and actions in three areas** that it said are proven to be directly related to reducing inequality:
 - Public services (health, education and social protection)
 - Taxation
 - Workers' rights
- **Nigeria, Bahrain and India**, which experienced the world's fastest-growing outbreak of **Covid-19**, were among the **world's worst-performing countries in tackling inequality** going into the pandemic.

▪ India's Position on the Index:

- **Overall, India ranked 129 in the CRI index** out of 158 countries **on government policies, and actions** in areas of public services of education, health, social protection, taxation, and workers' rights.

- India slipped from rank **141** in the year 2018 to **151** in the year 2020 with **weak labour rights and high incidence of vulnerable employment.**
 - Highest presence of the informal sector for men was in Uttar Pradesh at 86.9% and for women was in Andhra Pradesh at 73.6%.
- In terms of its **public services, it ranked 141.**
- India has been ranked **19** on the **taxation pillar.**

▪ **Reasons for India's Poor Performance:**

◦ **Exploiting Labours in Covid:**

- Several state governments in India have **used Covid-19 as a pretext to increase daily working hours from 8 to 12 hours** a day and **suspend minimum pay legislation**, devastating the livelihoods of millions of poor workers now battling hunger.

◦ **Low Health Budget:**

- India's **health budget was the fourth lowest** with half of its population having access to most essential health services, and more than 70% of health spending being met by people themselves.

◦ **Informal Jobs:**

- Most workers **earn less than half of the minimum wage**, 71% don't have any written job contract while 54% do not get paid leave.
- Only around **10% of the workforce in India is formal.**

▪ **Recommendation:**

- In response to the coronavirus pandemic, governments must dramatically improve their efforts on progressive spending, taxation and workers' pay and protection as part of National Inequality Reduction Plans under [Sustainable Development Goal \(SDG\) 10](#).

• **SDG 10:**

- It calls for reducing inequalities in income as well as those based on age, sex, disability, race, ethnicity, origin, religion or economic or other status within a country.
- It also addresses inequalities among countries, including those related to representation, migration and development assistance.
