

Trinetra App 2.0 | Uttar Pradesh | 23 Mar 2024

Why in News?

Recently, UP Police adopted **Trinetra app 2.0**, a digital platform for crime prevention and investigation.

Key Points

- With over 9.32 lakh criminal records now digitized within Trinetra's database, frontline officers will possess the capability to swiftly **identify suspects during security checks**.
- It can be used by all police personnel of Inspector and above rank as per requirement.
 - Police personnel can input and access comprehensive **crime-related information**, including crime histories, FIR details, interrogation reports, audio recordings, photographs, rewards, incarceration details, and seizure records.
 - It **empowers law enforcement with facial recognition capabilities**, enabling swift identification of suspects based on photographic data.
- The **Crime GPT feature** enables instant access to comprehensive information regarding criminals and criminal activities, streamlining investigative processes.
- Trinetra 2.0 also facilitates the search for missing individuals through photograph linking and facial recognition technology, bolstering efforts to locate and reunite missing persons with their families.
