

An MoU between the JC University and Inovik Energy

Why in News?

On 7 June 2023, J C Bose University of Science & Technology located in Faridabad, Haryana signed an MoU with Inovik Energy, a company specializing in the manufacture of electrical panels, in a significant step towards empowering students with employable skills in the energy sector.

Key Points:

- University Registrar Dr. Sunil Kumar Garg and Director of Inovik Energy Kumaresh Som signed the agreement. It was signed in the presence of Sushil Kumar Tomar.
- The collaboration between J.C. Bose University and Inovik Energy aims to conduct practical training, seminars & technical courses to students, enabling them to acquire the necessary skills & prepare them for a career in the industry.
- At the same time, the company will also offer industrial internships to students to provide them with an opportunity to work on industrial products.
- Expressing happiness over the industrial partnership for the skill development of students, Vice-Chancellor Prof. Shri Sushil Kumar Tomar stressed the need to make this partnership research-oriented.
- Kumaresh Som, Director, Inovik Energy, particularly stressed the growing demand for new & renewable energy sources including the need for innovation & adaptation in the energy sector.
- He said that due to the changes coming in the energy sector, conventional electric panels are going out of vogue. Inovik Energy is also moving towards the green energy sector and is working on the development of equipment in this area. The company will provide its support to students doing research in this field.
