International Women's Day 2019

On the occasion of International Women's Day, the **International Labor Organisation** releases a **report- A Quantum leap for gender equality: For a better future of work for all**.

Key Findings

- Women's employment rates are declining due to the rapid transition from agriculture to industrial sectors and the lack of care services and infrastructure.
- Under-representation of women at top management level in companies, globally less than one-third managers are women.
- Globally the difference in the employment rates for men and women, has shrunk by less than two percentage points in last 27 years.
- Women spend more time in unpaid care work at home contrast to man who spend just 8 minutes per day.
- Women do not receive the same dividends for education as men.
- Between 2005 and 2015, the motherhood employment penalty- the difference in the proportion of adult women with children under six years in employment and women without young children increased significantly by 38%.

International Women's Day

- International Women's Day (March 8) is a global day celebrating the social, economic, cultural and political achievements of women. The day also marks a call to action for accelerating gender parity.
- The theme for this year Women's Day is "Think Equal, Build Smart, Innovate for Change", it puts innovation by women and girls, for women and girls, at the heart of efforts to achieve gender equality.
- International Women's Day (IWD) has occurred for well over a century, with the first IWD gathering in 1911 supported by over a million people in Austria, Denmark, Germany and Switzerland.
- Prior to this the Socialist Party of America, United Kingdom's Suffragists and Suffragettes, and further groups campaigned for women's equality.
