# Why in News?

Recently, the <u>Artificial Intelligence (AI)</u> start-up Anthropic announced its latest family of AI models called **Claude 3**, stating that it "sets new industry benchmarks across a wide range of cognitive tasks".

 The family includes three state-of-the-art AI models in the ascending order of capabilities – Claude 3 Haiku, Claude 3 Sonnet, and Claude 3 Opus.

#### Note

- Anthropic is an OpenAI rival started by former leaders at the ChatGPT maker.
- While OpenAl has closely tied itself to its business partner Microsoft, Anthropic's primary cloud computing partner is Amazon.

### What is Claude 3?

#### About Claude:

- Claude is a group of Large Language Models (LLMs) developed by Anthropic.
  LLMs are a specific class of <u>generative AL</u> models that are trained to understand and generate human-like text.
- The chatbot is capable of handling text, voice messages, and documents.
- The chatbot is **capable of generating faster,** contextual responses compared to its peers.
- Training:
  - Claude sources include the Internet and some licensed datasets using two methods, Supervised Learning (SL) and Reinforcement Learning (RL).
  - In the SL phase, the LLM produces responses to prompts, and then self-assesses them based on a set of guiding principles.
    - It later revises the responses and according to its makers, this process is aimed at reducing the harmful effects of the Al's outputs.
  - RL phase involves **training the model based on AI-generated feedback,** in which the AI evaluates responses based on a set of constitutional principles.
    - These methods, and the general approach, has been chosen with the aim of making Claude helpful and harmless.
- Claude 3:
  - Among the new releases, Claude 3 Opus is the most powerful model, Claude 3 Sonnet is the middle model that is capable and price competitive, and Claude 3 Haiku is relevant for any use case that requires instant responses.
    - Claude Sonnet powers the Claude.ai chatbot for free at present and users only need an email sign-in.
    - However, Opus is only available through Anthropic's web chat interface and if a

user is subscribed to the Claude Pro service on the Anthropic website.

#### Limitations of Claude 3:

- Claude 3 performs well in tasks such as answering factual questions and optical character recognition (OCR), meaning the ability to extract text from images.
  - Reportedly, the new model is good at following instructions and completing tasks like writing Shakespearean sonnets.
- However, it struggles with complex reasoning and mathematical problems at times. It also exhibited biases in its responses, such as favouring a certain racial group over others.

# Q. With the present state of development, Artificial Intelligence can effectively do which of the following? (2020)

- 1. Bring down electricity consumption in industrial units
- 2. Create meaningful short stories and songs
- 3. Disease diagnosis
- 4. Text-to-Speech Conversion
- 5. Wireless transmission of electrical energy

#### Select the correct answer using the code given below:

(a) 1, 2, 3 and 5 only

- (b) 1, 3 and 4 only
- (c) 2, 4 and 5 only
- (d) 1, 2, 3, 4 and 5

Ans: (b)
