

Leith's Soft-shelled Turtle

Why in News?

At its <u>19th Meeting in Panama</u>, the Conference of Parties to CITES adopted India's proposal to move Leith's Softshell Turtle from Appendix II to Appendix I.

■ India's proposal for inclusion of **Jeypore Hill Gecko** (Cyrtodactylus jeyporensis) in Appendix II.

What is the Significance of the Listing?

- The CITES Appendix I listing of this Turtle species would ensure that legal international trade in the species does not take place for commercial purposes.
- It would also ensure that international trade in captive-bred specimens only takes place from registered facilities and further that higher and more proportionate penalties are provided for illegal trade of the species.
- The listing of the Leith's soft-shell turtle, thereby, strengthens its CITES protection status to ensure better survival of the species.

What is Leith's Soft-shelled Turtle?

- About:
 - Leith's Softshell Turtle (Nilssonia leithii) is a large freshwater soft-shelled turtle which
 is endemic to peninsular India and it inhabits rivers and reservoirs.
- Threats:
 - The species has been subject to intensive exploitation over the past 30 years.
 - It has been poached and illegally consumed within India. It has also been illegally traded abroad for meat and for its calipee.
 - The population of this turtle species is estimated to have declined by 90% over the
 past 30 years such that the species is now difficult to find.
- Protection Status:
 - The <u>International Union for Conservation of Nature (IUCN) Red List:</u> Critically Endangered
 - Wildlife Protection Act (WPA): Schedule IV
 - CITES: Appendix I
