Statement-I: Total Fertility Rate (TFR) of about 2.1 children per woman is called Replacement-level fertility.

Statement-II: TFR represents the average number of children a woman would have in her lifetime given the current age-specific fertility rates in the population.

Which one of the following is correct in respect of the above statements?

1. Both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement I
2. Both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement-I
3. Statement-I is correct but Statement-II is incorrect
4. Statement-I is incorrect but Statement-II is correct

Correct Answer : 2

Explanation

Total Fertility Rate (TFR):

- TFR of about 2.1 children per woman is called Replacement-level fertility. **Hence, statement-I is correct.**
 - TFR lower than 2.1 children per woman — indicates that a generation is not producing enough children to replace itself, eventually leading to an outright reduction in population.
- Total Fertility Rate (TFR) represents the **average number of children** a woman would have in her lifetime given the current age-specific fertility rates in the population. **Hence, statement-II is correct.**

Hence, option B is correct because both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement I.

Question 92:

Kalyanis, Baavis, and Gokattes recently seen in the news are best described as

1. Water bodies
2. Birds
3. Tribes
4. None of the above

Correct Answer : 1

Explanation

- Bengaluru, formerly Kalyana Nagara or the City of Lakes, had lakes created by human effort, where rainwater flowed through channels called rajakaluves.
- Lakes were constructed in a series, with overflow from upstream lakes flowing into the lakes downstream, with the wetlands around the lakes helping groundwater recharge.
- In proximity to the lakes were **several smaller water bodies**, for example, kalyanis (temple ponds), baavis (wells/stepwells), and gokattes (ponds for washing cattle).
- **Hence, option A is correct.**

Question 93:

Consider the following:

Statement-I: Merchant Discount Rate (MDR) is a fee that a merchant is charged by their issuing bank for accepting payments from their customers via credit and debit cards.

Statement-II: MDR compensates the bank issuing the card, the bank that installs the PoS (Point of Sale) terminal and network providers, and payment gateways for their services.

Which one of the following is correct in respect of the above statements?

1. Both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement I
2. Both Statement-I and Statement-II are correct and Statement-II is not the correct explanation for Statement-I
3. Statement-I is correct but Statement-II is incorrect
4. Statement-I is incorrect but Statement-II is correct

Correct Answer : 1

Explanation

Merchant Discount Rate (MDR):

- Merchant Discount Rate (MDR) is a fee that a **merchant is charged** by their issuing bank for accepting payments from their customers via credit and debit cards. **Hence, statement-I is correct.**
- MDR **compensates the bank** issuing the card, the bank that installs the PoS (Point of Sale) terminal and network providers, and payment gateways for their services. **Hence, statement-II is correct.**

Hence, option A is correct because both Statement-I and Statement-II are correct and Statement-II is the correct explanation for Statement I.
