

# **Graded Response Action Plan**

**Source: PIB** 

## Why in News?

Recently, the <u>Commission for Air Quality Management in NCR & Adjoining Areas (CAQM)</u> has announced a revision **in the existing** <u>Graded Response Action Plan (GRAP)</u> to combat air pollution in the region.

- The revised GRAP contains targeted actions that need to be taken by the agencies responsible/ implementing agencies when AQI (Air Quality Index) of Delhi goes beyond a certain threshold.
- Earlier, research was published in the journal Nature titled- "Machine learning-based country-level annual air pollutants exploration using Sentinel-5P and Google Earth Engine", showing that, during 2018-2021, India witnessed the maximum levels of human-induced Air Pollution.

## What is a Graded Response Action Plan (GRAP)?

#### About:

- GRAP is a **set of emergency measures** that kick in to prevent further deterioration of air quality once **it reaches a certain threshold** in the Delhi-NCR region.
- It was approved by the Supreme Court in 2016 after the Supreme Court's order in the matter of *M. C. Mehta vs. Union of India (2016)* and notified in 2017.

#### Implementation:

- From 2021 onwards, the GRAP is being implemented by the CAQM.
  - Till 2020, the Supreme Court-appointed <u>Environment Pollution (Prevention & Control) Authority (EPCA)</u> used to order States to implement GRAP measures.
- The EPCA was dissolved and replaced by the Commission for Air Quality Management (CAOM) in 2020.
- CAQM relies on air quality and meteorological forecasts by the Indian Institute of Tropical Meteorology (IITM) and the India Meteorological Department (IMD).

## Revision:

- Stage I (Poor Air Quality AQI 201-300): Enforce NGT / Hon'ble SC's order on over aged diesel / petrol vehicles.
- Stage II (Very Poor- AQI 301-400): Targeted actions to combat air pollution at identified hotspots in the region. Regulated operations of DG (Diesel Generators) have been set across all sectors in the NCR.
- Stage III ('Severe'- AQI 401-450): Impose strict restrictions on BS III petrol and BS IV
  diesel four-wheelers in certain areas and may suspend physical classes in schools for
  primary grade children up to Class 5.
- Stage IV (Severe Plus- AQI greater than 450): When the AQI exceeds 450, four-wheelers registered outside Delhi, except for electric vehicles, CNG vehicles, and BS-VI diesel vehicles and vehicle carrying essential commodity, will not be allowed to enter the city.

Note: An AQI is a number used by government agencies to measure the air pollution levels and

**communicate** it to the population. As the AQI increases, it means that a **large percentage of the population will experience severe adverse** health effects.

## What are the Government Initiatives to Combat Air Pollution?

- Graded Response Action Plan (Delhi)
- Polluter Pay principle
- Smog Tower
- Tallest Air Purifier
- National Clean Air Programme (NCAP)
- BS-VI vehicles
- New Commission for Air Quality Management
- Turbo Happy Seeder (THS)
- Air Quality and Weather Forecasting and Research (SAFAR)
- Dashboard for Monitoring Air Quality
- National Air Quality Index (AQI)
- Air (Prevention and Control of Pollution) Act, 1981
- Pradhan Mantri Ujjwala Yojana (PMUY)
