

Heritage Trees

Why in News

The Maharashtra Cabinet has passed an action plan to protect and preserve **trees older than 50 years in urban areas** by terming them heritage trees.

Key Points

- Concept of Heritage Tree:
 - Few important criteria for considering a tree as a "heritage tree" are: size, shape, rarity, aesthetical/historical values, association with historic person, place or even myths.
 - A certain species need not be native to an area for this tag.
- Components of Plan:
 - The provisions included in the plan are the concept of heritage trees and a plan of action for conservation, method to define the age of the tree, rules to be followed before hacking trees etc.
 - Compensatory Plantation:
 - It will include **planting the number of trees equivalent to the age** of trees to be cut.
 - The saplings need to be **six to eight feet in height** while planting and they will undergo **geo-tagging** with **seven years of caring period.**
 - The option of **monetary compensation** has also been given, instead of compensatory plantation.
 - State-level Tree Authority: The authority will be formed to protect and preserve heritage trees.
 - Tree Census: It will ensure that the tree census is conducted after every five years.
 - Land Use: Ensuring that 33% of government land is used for tree plantation.
