

# **Revisiting Corporate Social Responsibility**

This editorial is based on <u>"A plan for better CSR funds to boost rural livelihoods"</u> which was published in The Hindu on 07/10/2022. It talks about Corporate Social Responsibility (CSR) and its potential for rural development.

**For Prelims:** Corporate Social Responsibility (CSR), Trusteeship, Gandhian Philosophy, Section 135 of the Companies Act, 2013, Hunger, Poverty and Malnutrition, Environmental Sustainability, Clean Ganga Fund, Non-governmental Organisations (NGOs), Artificial Intelligence, Machine Learning, Circular Economy.

**For Mains:** Activities Included under CSR Category, Challenges Related to CSR Activities in India, Linking CSR with Research Institutions and Sustainable Development Goals.

In developing economies like India, <u>Corporate Social Responsibility (CSR)</u> is seen as part of **corporate philanthropy** in which **corporations augment the social development** to support the initiatives of the government.

And in keeping with the Indian tradition, it was believed that every company has a moral responsibility to play an active role in discharging the social obligations.

In the early 20<sup>th</sup> century <u>Mahatma Gandhi</u> introduced the **concept of** <u>trusteeship</u> **helping socioeconomic growth.** 

India became the first country to legislate the need to undertake CSR activities and mandatorily report CSR initiatives under <u>Section 135 of the Companies Act, 2013</u>. But current CSR frameworks have some flaws, such as transparency, lack of community participation in CSR activities, and lack of timely audits.

In order to achieve sustainable development, **India should streamline its CSR framework** and focus on **collective betterment through shared responsibility.** 

### Which Companies Fall Under the Purview of Corporate Social Responsibility?

- A company whose turnover is at least **1,000 crores**, net worth is at least **500 crores**, or net profit is at least **5 crores** falls under the CSR provisions of the **Companies Act, 2013.**
- Under the Act, companies must set up a **Corporate Social Responsibility Committee** that recommends a Corporate Social Responsibility Policy to the Board and monitors the same.
- The Act also encourages companies to spend 2% of their average net profit in the previous three years on CSR activities.

## What are the Activities Included under CSR Category?

- Specified under Schedule VII of the Companies Act 2013, some major activities include:
  - Eradicating hunger, poverty and malnutrition, promoting health care including preventive healthcare and sanitation including contribution to the Swach Bharat Kosh set-up by the Central Government for the promotion of sanitation and making available safe drinking water.
  - Promoting education, including special education and employment enhancing vocational skills especially among children, women, elderly and the differently abled and livelihood enhancement projects.
  - Promoting <u>gender equality</u>, <u>empowering women</u>, <u>setting up homes</u> and hostels for women and orphans; setting up old age homes, day care centres and such other facilities for <u>senior citizens</u> and <u>measures</u> for <u>reducing inequalities</u> faced by <u>socially</u> and <u>economically backward groups</u>.
  - Ensuring environmental sustainability, ecological balance, protection of flora and fauna, animal welfare, agroforestry, conservation of natural resources and maintaining quality of soil, air and water including contribution to the <u>Clean Ganga Fund</u> set-up by the Central Government for rejuvenation of river Ganga.

## What are the Challenges Related to CSR Activities in India?

- Shrinking Role of Government: Governments used to deliver social and environmental objectives in businesses through legislation and regulation.
  - Due to shrinking government resources and distrust of regulations, voluntary and non-regulatory initiatives are getting explored.
- Absence of Clear CSR Guidelines: There are no clear principles and directions about the CSR in India and because of lack of clear-cut statutory guidelines, the level of CSR depends upon the size of organisations, which means bigger the organisation, bigger the CSR programs.
  - This is also a **barrier for the small organisations** that want to contribute to this field.
- Duplication of CSR Activities: There is a lack of consensus amongst local agencies regarding CSR projects.
  - This lack of consensus often results in duplication of activities by corporate houses in areas of their intervention and results in a competitive spirit between local implementing agencies rather than building collaborative approaches on issue
- Unavailability of Well-Organized NGOs: Due to the lack of recognition of many Non-governmental Organisations (NGOs) in India, corporations have limited options and benefits, and they often partially fund NGOs in order to gain visibility and brand recognition, not realising that CSR serves a more important purpose.
  - Also, the lack of well-organised NGOs in remote and rural areas makes it difficult to identify real needs of the community and ensure successful CSR implementation.
- Lack of Time Bound Audits: The lack of time-bound audits causes many Indian companies
  to not disclose information about CSR activities they take part in, including funds used for
  the projects.
  - Also, as a result, these companies fail to create a sense of belonging and connect with society.

#### What Should be the Way Forward?

- Regular CSR Compliance: Companies should conduct regular reviews of CSR compliance and put in place measures for a more professional approach. They should also set clear objectives and align all stakeholders with them.
  - It is equally important to let their NGO partners know of their business needs.
- Proactive Role of Government: Governments should also address the issue of non-availability of NGOs and raise awareness about the importance of CSR in society.
  - Artificial Intelligence and Machine Learning tools can be used by the government to mine data from mandated reports in order to maintain regular audits.
- Linking CSR with Research Institutions: From Designing sustainable construction materials
  that are affordable and recyclable, to developing India-centric greening options like novel
  heat and power management systems.
  - Projects such as these can be enabled through CSR funding and led by higher education institutions that would accelerate the transition from laboratory to actualisation and

#### serve communities in innovative ways.

- SDG with CSR: With India prioritising and achieving <u>Sustainable Development Goals</u>, <u>NITI</u>
   <u>Aayog</u> has made this mainstream to the national agenda, and <u>now is the time to tie CSR and SDGs together</u>.
  - In this way, **India can improve accountability of CSR** at the same time moving towards green and sustainable growth.
- Integrated CSR Interface: A national platform, centralised by the Ministry of Corporate
  Affairs, is needed where all states can list their possible CSR-admissible projects so that
  companies can determine where their CSR funds would have the most impact.
  - Corporate Social Responsibility Projects Repository on the <u>India Investment Grid</u> (<u>IIG</u>) can serve as a guide for such efforts.
- Replacing End of Life Concept with CSR: Corporate social responsibility should replace end-of-life concepts for products with technologies and regulations that facilitate recycling and reusing.
  - In this way, the life cycle of products can be extended, wastage can be minimised, and pollution reduced. In line, India can transition towards a circular economy.

ne Vision

 This can be an attempt to realise the vision of a just, humane and equitable society where every action, however small, is driven by this larger sustainable vision.

#### **Drishti Mains Ouestion**

Describe how Corporate Social Responsibility can facilitate India to achieve Sustainable Development Goals.
