2. The Gross Domestic Product at market prices (in rupees) has steadily increased in the last decade.

### Which of the statements given above is/are correct?

- (a) 1 only
- (b) 2 only
- (c) Both 1 and 2
- (d) Neither 1 nor 2

**Ans: (b)**

### Explanation:

- Gross Domestic Product (GDP) is the monetary value of all the final goods and services produced within a country's borders in a specific time period, generally 1 year. It is a broad measurement of a nation's overall economic activity.
- Real Gross Domestic Product is an inflation-adjusted measure that reflects the value of all goods and services produced by an economy in a given year, expressed in base-year prices.
- The rate of growth of real GDP has not steadily increased in the last decade. It has fluctuated due to various international and domestic economic pressures. Hence, statement 1 is not correct.
- The GDP at market prices of India has steadily increased in the last decade from around 900 billion USD in 2005 to 2.1 trillion USD in 2015. As of 2020 India's GDP is 2.63 trillion USD. Hence, statement 2 is correct.
- **Therefore, option (b) is the correct answer.**
