to destination markets for synthetic drugs.

- This is posing significant challenges to communities and their public health systems.

▪ **Challenges in Online Drug Trafficking:**

- There is an evolving landscape of **online drug trafficking**, presenting new challenges to drug control.
- The increased availability of **illicit drugs on the Internet**, exploitation by criminal groups of online platforms, and the risk of overdose deaths due to the online presence of **synthetic opioids like fentanyl** are significant challenges.

▪ **Exploitation of Online Platforms:**

- Criminals are **exploiting legitimate e-commerce platforms**, social media, and other online platforms for drug trafficking.
- Encryption methods, anonymous browsing on the darknet, and cryptocurrencies are **used to avoid detection**, making it **difficult to prosecute** online trafficking offences.
 - France's law enforcement authorities collected more than 120 million text messages **from 60,000 mobile phones**.

▪ **Concerns about Patient Safety:**

- Patient safety is at risk from illicit Internet pharmacies that sell drugs without a prescription directly to consumers.
- It is impossible for consumers to know whether the drugs are counterfeit, unapproved or even illegal.
- The global trade in illicit pharmaceuticals is estimated **to be worth 4.4 billion USD**.

▪ **Recommendations:**

- Despite challenges, there are opportunities to **use online platforms for drug use prevention, awareness campaigns**, and improving access to drug treatment services.
 - Governments **can use social media platforms to conduct drug use prevention** campaigns to prevent substance misuse among young people in particular.
- **Telemedicine and Internet pharmacies** could improve access to healthcare and help reach patients with drug use disorders and deliver drug treatment services to more people.
- Online platforms could also be **used for sharing information about the adverse consequences of drug use** and communicating warnings of adulterated drugs which could save lives.
- Placing certain **amphetamine-type stimulant precursors and fentanyl precursors under international control** to prevent illicit drug manufacturers from substituting controlled chemicals with closely related substitutes.
- Given the global nature of online platforms, **collaborative efforts between governments, international organizations**, regulatory authorities, and the private sector are essential to identify new threats and develop effective responses.
 - INCB encourages voluntary cooperation to tackle the misuse of legitimate e-commerce platforms for drug trafficking.
