

Biodiversity Management Committees

Why in News

The <u>National Green Tribunal</u> has extended the time limit for the constitution of **Biodiversity**Management Committees (BMCs) and preparation of **People's Biodiversity Registers (PBRs)** on account of the <u>Covid-19 pandemic</u>.

Key Points

- Biodiversity Management Committees (BMC)
 - As per the <u>Biological Diversity Act 2002</u>, BMCs are created for "promoting conservation, sustainable use and documentation of biological diversity" by local bodies across the country.
 - Composition:
 - It shall consist of a **chair person** and **not more than six persons nominated by the local body,** of whom not less than one third should be women and not less than 18% should belong to the **Scheduled Castes/ Scheduled Tribes.**
 - The main function of the BMC is to prepare **People's Biodiversity Register** in consultation with the **local people**.
- People's Biodiversity Registers (PBR):
 - The Registers entail a complete documentation of biodiversity in the area plants, food sources, wildlife, medicinal sources, etc.
 - Advantages of PBR:
 - A good PBR will aid in tracing how habitats are changing, and to understand and estimate parts of our forests.
 - Prevent Biopiracy:
 - The indigenous and local community are a repository of traditional knowledge and their knowledge and practices help in conservation and sustainable development of biodiversity.
 - Being a bottom-up exercise, it is also a means of understanding the overlap of cultural and natural biodiversity.
 - It envisages a decentralised way through an **inclusive approach.**

Biodiversity Governance in India

- India's Biological Diversity Act 2002 (BD Act), is in close synergy with the <u>Nagoya Protocol</u> and aims to implement provisions of the <u>Convention on Biological Diversity (CBD)</u>.
 - The Nagoya Protocol sought to ensure commercial and research utilisation of genetic resources led to sharing its benefits with the government and the community that conserved such resources.
- The BD Act was hailed as an important step towards preserving India's vast biodiversity, as it

recognised the sovereign right of countries over its natural resources.

- The BD Act seeks to address issues of managing bio-resources in the most decentralised manner possible.
- The BD Act envisages three layered structures:
 - The National Biodiversity Authority (NBA) at the national level.
 - The **State Biodiversity Boards** (SSBs) at the state level
 - **Biodiversity Management Committees** (BMCs) at the local level.
- The act also strengthens the country's stand with respect to anyone claiming an intellectual property right over biodiversity-related knowledge.

Convention on Biological Diversity (CBD)

- A legally binding treaty to conserve biodiversity has been in force since 1993. It has 3 main objectives:
 - The **conservation** of biological diversity.
 - The **sustainable use** of the components of biological diversity.
 - The fair and equitable sharing of the benefits arising out of the utilization of genetic resources.

The Vision
