

# **UN World Restoration Flagships**

**For Prelims:** <u>United Nations</u>, World Restoration Flagship Award, Restoring Mediterranean Forests Initiative, Living Indus initiative, Terai Arc Landscape Initiative, <u>UN Environment Programme</u>, <u>Food and Agriculture Organization</u>

For Mains: World Restoration Flagships, Environmental Pollution & Degradation, Conservation

#### **Source: DTE**

## Why in News?

The <u>United Nations</u> has recognized **seven initiatives** from regions spanning Africa, and Latin America, the Mediterranean, and Southeast Asia as **World Restoration Flagships**.

- These initiatives, aimed at **reviving ecosystems on the brink of degradation**, hold promise for environmental conservation and socio-economic development.
- The combined efforts of these initiatives are projected to restore approximately 40 million hectares of land and generate around 500,000 employment opportunities.

# What are the 7 World Restoration Flagships recently Recognized by the UN?

- The Restoring Mediterranean Forests Initiative:
  - Involves the countries of Lebanon, Morocco, Tunisia, and Türkiye.
  - It consists of a novel approach said to have protected and restored natural habitats and vulnerable ecosystems.
  - Around 2 million hectares of forests have been restored since 2017; aims for over 8 million by 2030.
- The Living Indus initiative:
  - Approved by Pakistan parliament post-2022 <u>climate change-induced floods</u>. Its official launch took place at the <u>27<sup>th</sup> Conference of Parties to the UN Framework</u> <u>Convention on Climate Change</u> in Sharm el-Sheikh.
  - Aims to restore 25 million hectares of the Indus river basin by 2030.
  - It designates the **Indus River as a living entity with rights,** a measure taken to protect rivers elsewhere as well.
  - It involves Australia, Bangladesh, Bolivia, Brazil, Canada, Ecuador, India, New Zealand, Peru and Sri Lanka.
- The Acción Andina Social Movement:
  - It is led by the non-profit Andean Ecosystems Association (ECOAN) and aims to protect and restore one million hectares of Andean forests.
    - Andean forests are a type of <u>tropical and subtropical forest</u> that grow along the slopes of the Andes mountains in **South America**.
  - The initiative also works to **secure land titles for local communities** and protect the forest from mining and timber exploitation.
- Sri Lanka Mangrove Regeneration Initiative:

- It is a science-driven programme co-led by local communities. It focuses on the restoration of natural balance in the ecosystem.
- Since its launch in 2015, efforts have led to 500 hectares of restored mangroves, according to the UN statement.
- Targets restoration of 10,000 hectares of mangroves by 2030.

## Terai Arc Landscape(TAL) Initiative:

- Aimed to restore the forests of critical corridors of the TAL in collaboration with local communities working as citizen scientists, community-based anti-poaching units, and forest guards, among others.
  - TAL spans an 810 km stretch between the river Yamuna in the west and the river Bhagmati in the east.
  - It comprises the **Shivalik hills**, the adjoining **bhabhar areas**, and the Terai floodplains, covering parts of the Indian states of Uttarakhand, Uttar Pradesh, Bihar, and the low-lying hills of Nepal.
- Initiative covers measures like the restoration of 66,800 hectares of Nepal's forests, which is said to improve the livelihoods of about 500,000 households in the country.
  - It also supported the <u>tiger</u> population in the landscape shared by India and Nepal, which increased to 1,174.
- Aims to restore 350,000 hectares of forests by 2030.

## Regreening Africa's Agriculture:

- It increases carbon storage, boosts crop and grass yields, makes soil more resilient (by preventing floods) and treats it with fixed nitrogen that acts as a natural fertiliser.
- Growing Forests in Africa's Drylands Initiative:
  - Expands restoration from 41,000 to 229,000 hectares by 2030.
  - Involves African farmers, planting tens of millions of trees annually.
  - Creates over 230,000 jobs, supporting sustainable development.

# What are UN World Restoration Flagships?

#### About:

- ne Vision • The World Restoration Flagships are part of the UN Decade on Ecosystem Restoration led by the **UN Environment Programme (UNEP)** and the **Food and Agriculture** Organization of the UN (FAO) which aims to prevent, halt, and reverse the degradation of ecosystems on every continent and in every ocean.
  - The UN General Assembly has declared 2021-2030 as the UN Decade on **Ecosystem Restoration.**
- The UN recognizes the World Restoration Flagships through the World Restoration Flagship Award.
  - This award is part of the **UN Decade on Ecosystem Restoration**, spearheaded by UNEP and FAO, which aims to counteract ecosystem degradation across all continents and oceans.
  - Recipients of this award become eligible for technical and financial assistance from the UNO.
  - The awards track notable initiatives following global commitments to restore **one billion hectares** (an area larger than China).

#### Significance:

- Global recognition and celebration of their restoration success stories.
- Technical and financial support of up to USD 500,000 per selected initiative (only for developing countries).
- Attraction of global attention and investments.
- Feature in the UN Decade's publications, campaigns, outreach, advocacy, and education efforts.
- Listing in the UN Secretary-General's Report to the General Assembly.

# What is Ecological Restoration?

## About:

 It is the process of aiding the recovery of ecosystems that have been degraded, damaged, or destroyed.

## Causes of Degradation:

 Human activities like selective logging, road building, poaching, overfishing, invasive species, land clearing, urbanization, <u>coastal erosion</u>, and <u>mining</u> can lead to damage, degradation, or destruction of ecosystems.

## Aims and Objectives:

 Ecological restoration aims to initiate or accelerate ecosystem recovery by creating conditions for plants, animals, and microorganisms to carry out the recovery process themselves.

#### Methods and Actions:

- Restoration may involve actions like removing invasive species, reintroducing lost species or functions, altering landforms, planting vegetation, changing hydrology, and reintroducing wildlife.
- Restoration is not a one-time activity; it continues as the ecosystem recovers and matures.
  Unforeseen barriers may arise during the recovery process.

### Restoration and Conservation:

 Restoration is not a substitute for conservation. While it can restore biodiversity, structure, and function to ecosystems, it should not be used to justify destruction or unsustainable use.

#### India's Restoration Initiatives:

- Sundarbans Mangrove Restoration.
- National Plan for Conservation of Aquatic Ecosystems (NPCA).
- National Mission for a Green India (GIM).
- Western Ghats Forest Landscape Restoration.
- Green Wall.
- National Afforestation Programme (NAP).
- National Biodiversity Action Plan.

## **UPSC Civil Services Examination, Previous Year Questions (PYQs)**

## **Prelims**

## Q1. Which of the following can be threats to the biodiversity of a geographical area? (2012)

- 1. Global warming
- 2. Fragmentation of habitat
- 3. Invasion of alien species
- 4. Promotion of vegetarianism

# Select the correct answer using the codes given below:

- (a) 1, 2 and 3 only
- **(b)** 2 and 3 only
- (c) 1 and 4 only
- (d) 1, 2, 3 and 4

#### Ans: (a)

### Q2. Biodiversity forms the basis for human existence in the following ways: (2011)

- 1. Soil formation
- 2. Prevention of soil erosion
- 3. Recycling of waste
- 4. Pollination of crops

## Select the correct answer using the codes given below:

- (a) 1, 2 and 3 only
- **(b)** 2, 3 and 4 only
- (c) 1 and 4 only
- (d) 1, 2, 3 and 4

Ans: (d)

# **Mains**

**Q.** How does biodiversity vary in India? How is the Biological Diversity Act,2002 helpful in the conservation of flora and fauna? **(2018)**
