

## **DRDO Conducted Weapon System Trials**

## Why in News?

The <u>Defence Research and Development Organisation (DRDO)</u> has reached a significant milestone by conducting successful trials of the <u>Man-Portable Anti-Tank Guided Missile (MPATGM) Weapon</u>
<u>System.</u>

 MPATGM which has a range of 2.5 kilometers, with fire-and-forget and top attack capabilities for infantry use.

## **Key Points**

- The tests, conducted at the **Pokhran Field Firing Range (PFFR)** in Rajasthan, showcased the impressive performance of the MPATGM in front of the user team.
- Created and produced in India by DRDO, the MPATGM Weapon System includes the MPATGM, Man Portable Launcher, Target Acquisition System (TAS), and Fire Control Unit (FCU).
- The testing has proven that the system can function within the full operational specifications outlined by the Indian Army's General Staff Qualitative Requirements (GSQR).
  - The completion of penetration trials for the Tandem Warhead System of the MPATGM demonstrates its ability to defeat modern armor-protected Main Battle Tanks.
  - With day/night and top attack capabilities, this Anti-Tank Guided Missile system features a dual-mode seeker for increased effectiveness in tank warfare situations.
- The successful trials were a crucial stride towards realizing the vision of <u>'Atmanirbhar Bharat'</u> (self-reliant India).

## **Defence Research & Development Organisation**

- It is the Research & Development wing of the Ministry of Defence, Government of India, with a vision to empower India with cutting-edge defence technologies.
- It was established in 1958 after combining the Technical Development Establishment (TDEs) of the Indian Army and the Directorate of Technical Development & Production (DTDP) with the Defence Science Organisation (DSO).
