

Study Material in Indian Languages

The Government of India has directed <u>school</u> and <u>higher education</u> regulators and heads of educational institutions to make study material in Indian languages available for all courses in the next three years.

- Study material for all courses under school and higher education will be made available digitally in Indian languages included in the <u>8th Schedule of the Constitution</u>.
- This decision is in line with the recommendations of the **National Education Policy (NEP-2020)** to promote multilingualism in education at every level.
 - Content creation in local languages will boost this multilingual asset and pave way for its better contribution to <u>'Viksit Bharat'</u> to make our country as <u>developed nation by</u>
 2047.
- The government has been working in this direction for the past two years, with translation of various educational materials being done through the Anuvadini Al-based App.
 - In the school education ecosystem also study material is available in multiple Indian languages including **over 30 languages on** <u>DIKSHA</u>.
 - Competitive exams like JEE, NEET, and CUET are being held in 13 Indian languages.
