

## **Plan Bee**

**Plan Bee,** a unique strategy adopted by **Northeast Frontier Railway** (NFR) to keep <u>wild elephants</u> away from railway tracks, has won the **best innovation award** by Indian Railways.

- Northeast Frontier Railway (NFR)'s Plan Bee, involves setting up of devices (an amplifying system imitating the buzz of a swarm of honey bees) near tracks, which emit the 'buzzing' sound of swarming bees, considered as a natural repellent of elephants (elephants have a natural fear of the perilous stings of the insects).
  - First one was installed near the Guwahati railway station.
- The sound is audible to elephants 600-700 meters away and thus helps them in keeping away from the tracks.
- According to wildlife experts, India has the highest number of train accidents involving elephants in the world.
