Panini's Ashtadhyayi & Grammar's Greatest Puzzle

Why in News?

Recently, a Cambridge scholar Dr Rishi Rajpopat's has claimed to have solved **Sanskrit's biggest puzzle**—a grammar problem found in the '**Ashtadhyayi**'.

What is Ashtadhyayi?

- Written more than 2,000 years ago, **Ashtadhyayi** or '**Eight Chapters**', is an ancient text written by the scholar **Panini towards the end of the 4th century BC**.
- It is a linguistic text that set the **standard for how Sanskrit was meant to be written and spoken**.

Note:

- It delves deep into the **language's phonetics, syntax and grammar**, and also offers a 'language machine', where one can feed in **the root and suffix of any Sanskrit word**, and get **grammatically correct words and sentences** in return.
- The Ashtadhyayi laid down more than 4,000 grammatical rules.
 - Later Indian grammars such as the Mahabhasya of Patanjali (2nd century BC) and the Kasika Vritti of Jayaditya and Vamana (7th century AD), were **mostly commentaries on Panini**.

What was the Puzzle?

➤ Confusing Rules:

- In Ashtadhyayi, there were **two or more of the rules of Grammar that could apply at the same time, causing confusion**.
- To resolve this, Panini had provided a '**meta-rule**' (a rule governing rules), which had historically been interpreted as- In the event of a conflict between two rules of equal strength, the rule that comes later in the **serial order of the 'Ashtadhyayi'** wins.
- However, it kept producing exceptions, for which **scholars had to keep writing additional rules**. This is where Dr Rishi Rajpopat's discovery came through.

➤ Solution:

- The Scholar took a simpler approach, arguing that the **meta-rule has been wrongly interpreted throughout history**; what Panini actually meant was that for rules applying to the left and right sides of a word, **readers should use the right-hand side rule**.
- Using this logic, Dr Rajpopat found that the '**Ashtadhyayi**' could finally become an accurate '**language machine**', producing **grammatically sound words and sentences almost every time**.

➤ Significance:

- The discovery now makes it possible to construct millions of Sanskrit words using Panini's system—and since his grammar rules were exact and formulaic, they can act as a Sanskrit language algorithm that can be taught to computers.

Take 'mantra' and 'guru' as examples.

In the sentence 'devāḥ prasannāḥ mantraiḥ' ('The Gods [devāḥ] are pleased [prasannāḥ] by the mantras [mantraiḥ]') we encounter 'rule conflict' when deriving mantraiḥ 'by the mantras'.

The derivation starts with '**mantra + bhis**'. One rule is applicable to left part '**mantra**' and the other to right part '**bhis**'. We must pick the rule applicable to the right part '**bhis**', which gives us the correct form '**mantraiḥ**'.

And in the the sentence 'jñānaṁ dīyate guruṇā' ('Knowledge [jñānaṁ] is given [dīyate] by the guru [guruṇā]') we encounter rule conflict when deriving guruṇā 'by the guru'.

The derivation starts with '**guru + ā**'. One rule is applicable to left part '**guru**' and the other to right part '**ā**'.

We must pick the rule applicable to the right part '**ā**', which gives us the correct form '**guruṇā**'.

Who was Panini, the Father of Linguistics?

- Panini probably lived in the 4th century BC, the **age of the conquests of Alexander and the founding of the Mauryan Empire**, even though he has also been dated to the 6th century BC, the age of The **Buddha and Mahavira**.
- He likely lived in **Salatura (Gandhara)**, which today would lie in **north-west Pakistan**, and was probably associated with the **great university at Taksasila**, which also produced **Kautilya and Charaka**, the ancient Indian masters of statecraft and medicine respectively.
- By the time Panini's great grammar, the 'Ashtadhyayi' was composed, Sanskrit had virtually reached its classical form — and developed little thereafter.
- Panini's grammar, which built on the work of many earlier grammarians, effectively **stabilised the Sanskrit language**.
- The earlier works had recognised the root as the basic element of a word, and had classified **some 2,000 monosyllabic roots which**, with the addition of prefixes, suffixes and inflexions, were thought to provide all the words of the language.

Who was Rani Chennamma?

- **About:**
 - Chennamma was born on 23rd October 1778, in Kagati, a small village in present-day Belagavi district in Karnataka.
 - At the age of 15, she married Raja Mallasarja of Kittur, who ruled the province until 1816.
 - After Mallasarja's death in 1816, his eldest son, ShivalingarudraSarja, ascended the throne. But it wasn't long before Shivalingarudra's health started deteriorating.
 - Kittur needed an heir apparent to survive. However, Shivalingarudra had no natural heir and Chennamma too had lost her son.

 - Lavani is a vibrant and expressive folk art form that has its roots in the cultural heritage of Maharashtra, but it has also found a place in certain parts of Karnataka. The word "**Lavani**" is derived from the Marathi term "**lavanya**," which means beauty.
 - Lavani is a combination of traditional song and dance, performed to the rhythmic beats of the Dholki, a percussion instrument.

What is the Doctrine of Lapse?

- On March 2, 1930, Mahatma Gandhi wrote a letter to **Lord Irwin, the Viceroy of India**, informing him of his intention to break the salt law as an act of civil disobedience.
- The Dandi March, also known as the **Salt Satyagraha or Salt March**, marked a pivotal moment in the country's fight for independence from British colonial rule.

➤ Dandi March:

- The Dandi March commenced from the **Sabarmati Ashram in Ahmedabad on March 12, 1930**, with Mahatma Gandhi leading.
 - The 24-day march spanned four districts and passed through 48 villages.
- On April 6, 1930, Gandhi symbolically broke the salt law by picking up a handful of salt from the shores of Dandi, starting the civil disobedience movement against the British salt monopoly.
 - Gandhi chose 6 April to start the mass breaking of the salt laws for a symbolic reason - it was the first day of National Week, which began in **1919 when Gandhi planned the national hartal (strike)** against the **Rowlatt Act**.
