

Green India Expo in Bhopal

Why in News?

The three-day **Green India Expo** concluded on 23 March 2025 in **Bhopal** in which reputed **companies, manufacturers and potential investors from all over the country** participated.

Key Points

- **About the Expo:**
 - The expo was organised by **Imagine Events and Dickey's**.
 - The main objective of this expo was **to promote green energy and entrepreneurship**
- **Main attractions:**
 - **Solar energy**: A golden opportunity for savings and business.
 - **Freedom from electricity bill**: Benefit of **free electricity for 30 years** on adopting the solar system.
 - **Subsidy worth lakhs**: Attractive subsidy on **solar panels and lights** under government schemes.
 - **Wide range of e-vehicles**: Showcasing **electric vehicles** for domestic and commercial use.

Green Energy

- It is a term used for **energy obtained from renewable sources**. Green energy is also often referred to as clean, sustainable or renewable energy.
- Green energy production **does not emit toxic greenhouse gases into the atmosphere**, which means it has very little (or negligible) environmental impact.
- Green energy sources include electricity produced by **solar, wind, geothermal, biogas, hydroelectricity**, and some eligible biomass sources.
