

US Withdrawal from Loss and Damage Fund

[Source: IE](#)

The US has withdrawn from the [Loss and Damage Fund \(LDF\)](#), furthering its disengagement from global climate commitments like the [Paris Agreement](#) and [Green Climate Fund](#).

- **LDF:** Created at [UN Climate Change Conference COP 27](#) in Egypt, the **LDF** supports **developing and small island nations** facing climate-induced losses like **rising sea levels, heatwaves, and extreme weather**, with contributions from **developed nations**.
 - The **LDF** is managed by a **Governing Board**, with the [World Bank](#) as its interim trustee.
 - Nearly **USD 750 million** pledged under **LDF**, with the **US contributing USD 17.5 million** before withdrawing.
- **Implications of US Withdrawal:** Vulnerable nations, including **India (which alone faced USD 56 billion in weather-related damages (2019 - 2023))**, face growing uncertainty in climate aid, further straining North-South climate negotiations.
