## Key Points

### ▪ Committee's Recommendation:

- **Habitat Limitations:**
  - The **current area lacks the capacity to support a sustainable tiger population**. The report suggests adding more areas to the proposed reserve.
- **Village Relocation:**
  - A strategic, voluntary relocation plan for **sparsely populated villages within the proposed reserve area is recommended** to secure undisturbed habitats and enhance villagers' quality of life through sustainable resettlement.
- **Invasive Species Control:**
  - Removing invasive weeds and planting native, palatable grasses are essential to restore suitable habitats for wild herbivores and promote biodiversity.
- **Prey Base Development:**
  - Relocating 1,000–2,000 [spotted deer \(chital\)](#) is recommended to boost prey availability, benefiting the population of predators.
- **Anti-Poaching and Infrastructure:**
  - Strengthening [anti-poaching](#) measures, wireless communications, and patrol roads is necessary.
- **Geographic Scope:**
  - The Kumbhalgarh Tiger Reserve would **span approximately 1,397 sq km** across **Rajsamand, Udaipur, Pali, Ajmer, and Sirohi districts** in Rajasthan.

## Spotted Deer (Chital)

- The chital, also known as the **spotted deer or axis deer**, is a graceful and elegant herbivore native to the grasslands and forests of **India and Sri Lanka**.
- They prefer open grasslands, savannas, and lightly forested areas.
  - [IUCN Red list](#): Least Concern
  - [Wildlife Protection Act, 1972](#): Schedule II.
