I owe my success to Almighty God, my mother, my brother and entire wooo team. I use to do the preparation along with my job. I did B.Tech in Electronics & Instrumentation; so many subjects were new to me. However once I started I enjoyed learning subjects, which helped to sustain long study hours. The teaching pedagogy was very effective. Many questions were directly clicked from general studies notes provided by wooo. Mock interview helped me to filter out my weaknesses. I obtained 142 marks out of 200 marks in personality test, according to me positive attitude and practical thinking is very important while facing interview.
